Each Connection Port End Can
Accommodate Any Combination Up To:

BSC-01 (small)	1 X #12
	1 X #14
	2 X #16
	3 X #18

BSC-02 (Medium)	1 X #8
	2 X #10
	3 X #12
	4 X #14
	6 X #16
	8 X #18

BSC-03 (Large)	2 X #8
	4 X #10
	6 X #12
	8 X #14
	12 X #16
	16 X #18

New Solid Brass Splice Connector

Make rugged waterproof splices that stand the test of time with Vista's Brass Splice Connector (BSC). It is a completely waterproof direct-burial connector and conductor designed specifically for low-voltage landscape lighting applications.

Available in three different sizes to accommodate different cable gauges and multiple cable splices, the unit features two solid brass set screws that firmly secure the wire in place for a lifetime connection.

Each splice kit includes the brass connector, set screws; an Allen wrench and the waterproof heat shrink material. The connector is made with Vista's computer numeric controlled (CNC) machining station from solid bar stock.

- Model BSC-1 (small) connects 12-gauge cable with up to three 18-gauge fixture leads.
- Model BSC-2 (medium) handles a variety of splicing requirements including up to three 12-gauge cables on each end.
- Model BSC-3 is the largest size and easily accommodates up to six 12-gauge cables on each end.

Pick up some of these rugged connectors at your Vista distributor today.
