

VERTICAL STEP LIGHTS *1500 SERIES LED*

1500 Series Vertical Step Lights from Vista Architectural Lighting feature sharp cutoff LED optics for precise, balanced illumination without glare. To facilitate performance, individual reflectors featuring a highly specular lighting sheet and an aluminum frame painted white encase each three or six up LED configuration. The assembly is mounted into a standard Vista "Performance Optic Package" mounting frame. The modular LED design eases installation and the housings are fully sealed to prevent moisture penetration. Several louver designs and door options—including sheer glass, stainless steel and brass—are available to aesthetically enhance functionality. The series utilizes Cree® XT-E LEDs.

SERIES ADVANTAGES

- » Sharp cutoff optics for balanced illumination without glare
- » Minimalist and traditional styling; sheer glass, stainless steel and brass doors with optional face treatments
- » Modular LED design enhances and speeds installation
- » Modular LED design enhances and speeds installation
- » Available color temperatures from 2700°K to 5000°K
- » Dimming options include Phase Cut TRIAC and 0-10VDC
- » Accommodates interior or exterior installations; IC and non-IC rated
- » Universal voltage drivers 120-277V
- » Fully sealed to prevent moisture penetration
- » Quick ship polymeric boxes; box extensions available to correct improper installations
- » Suitable for through branch circuiting
- » Stainless steel hardware
