Control Your Landscape
Lighting From Anywhere

CONVENIENCE

Convenience of Setting
Schedules and Scenes

Any Color, Any Time

Paint the night and instantly transform your outdoor living space with Vista Pro's "App to Fixture" Chroma Connect RGBW landscape lighting system. Vibrant, full-spectrum colors and pleasing shades of white light provide homeowners infinite color customization.

Tunable White

Adjustable color temperatures, ranging from warm amber light (2200K) to cool blue tones of white (5600K).

RGB Color Adjustable

With RGB technology, you can select any solid color on the spectrum, from a deep, bold red to an inviting cool purple.

Bluetooth Mesh Connection

Discover the freedom and flexibility of wireless control. Chroma Connects technology utilizes a Bluetooth Mesh Network that allows each fixture to continuously send and receive data to provide greater user-control, installation flexibility and the strongest signal connections.

Reduce Installation & Setup Time

Chroma Connect light fixtures automatically communicate with one another, thus making the setup connection process seamless and efficient. Once the lights become energized, the Bluetooth Mesh Network connects the first synchronized fixture with the remaining Chroma Connect enabled fixtures on the property. Within minutes your system will be ready for use and additional customization.

Full Control, In The Palm of Your Hand

With Vista Pro's Chroma Connect, you will wirelessly control the color, intensity, and timing of your exterior lighting directly from your smartphone or Bluetooth-enabled device.

Full-Spectrum RGBW Color Selection
