We Salute an Industry Pioneer

Anthony W. "Tony" LaFetra

We at Vista want to express our sincere condolences to the LaFetra family and everyone at Rain Bird Corporation on the passing of CEO and President Anthony W. "Tony" LaFetra on Friday, January 29, 2021.

Tony was a true pioneer in the irrigation industry, and his keen focus on innovation and quality took Rain Bird to new heights — not just domestically, but internationally. He was extremely passionate about his work, his employees and his community. Under his leadership, Rain Bird went from a primarily agriculture sprinkler manufacturer to a leading provider of irrigation products used on landscapes, golf courses, sports fields and farms everywhere. Clearly, those of us who help property owners maintain healthy, beautiful landscapes have benefitted from Tony's vision and dedication over the years.

Tony wasn't just a businessperson; he also believed in the importance of philanthropy to help make the world a better place. He helped many employees achieve advanced degrees, he sat on the boards of directors of several universities and he supported numerous charitable organizations throughout California.

While Tony's time here on earth may be over, his spirit and dedication will live on through his company, his family and his many colleagues and friends. Rest in peace, Tony.
